

Diabetes Prediction – Sample Clinical Data Report

This document contains sample clinical input values for diabetic and non-diabetic cases used for ML-based diabetes prediction systems.

Non-Diabetic Patient Sample

Parameter	Value	Unit
Number of Pregnancies	1	count
Glucose Level	95	mg/dL
Blood Pressure	70	mmHg
Skin Thickness	20	mm
Insulin Level	85	μU/mL
BMI	22.4	kg/m ²
Diabetes Pedigree Function	0.210	ratio
Age	28	years

Diabetic Patient Sample

Parameter	Value	Unit
Number of Pregnancies	3	count
Glucose Level	168	mg/dL
Blood Pressure	78	mmHg
Skin Thickness	35	mm
Insulin Level	180	μU/mL
BMI	34.1	kg/m ²
Diabetes Pedigree Function	0.720	ratio
Age	52	years

Disclaimer: These values are sample clinical data for academic and project demonstration purposes only. They are not intended for real medical diagnosis or treatment.
